**User Story 001**

**User Story 001**  
As a registered admin user, there should be an URL. So By typing that URL registered can access the system.

**Description**

1. User will access the page, by typing the URL.
2. If user enters wrong email id or password, then a generic error as "Please Check Your Log In Credentials" will be shown.
3. If user clicks on "Forgot Password" he'll be redirected to User Story 002.
4. If user enters correct user credentials, he'll be then get redirected to dashboard.

**Acceptance Criteria**

1. If user enters an inner page name directly into the address bar, then check whether the user is logged in or not? If user is logged in then, check user has a permission to access the page or not? if user dont have permission, then show appropriate message to user. If user is not logged in, then redirect user to log in page.
2. If user types only domain name in address bar without putting "/sign-in.php" then auto redirect user to this page.
3. Leading and trailing whitespaces in user name should get trimmed.
4. FOS user should not be able to log in to the system.

**User Story 002**  
As a registered admin user, there should be a provision for me to reset my password. So, at the time of logging in into the system, if I forgot my credentials, I should be able to reset my password.

**Description**

1. User can come here from User Story 001.
2. Once user enters his registered email here and clicks Continue, he'll see User Story 003.
3. User will receive Password reset link on his email.
4. After clicking on the link in the email, user will get redirected to User Story 004.
5. If user enters wrong email id, then system will show him error as "Please check your email id".

**Acceptance Criteria**

1. Proper email id validation should be applied here.
2. Validity of Password reset link is 30 minutes. After 30 minutes if user clicks on this link again. Then Show pop up message as "Link Expired! Click on Forgot Password Again To Generate New Link".
3. Once the Password Reset link is used, then it should get expired. So that if the user sends this link again to someone via text message/email, this will not work.
4. Only admin registered users should get password reset link.
5. FOS user should not be able to reset the password through this page.

**User Story 003**

**User Story 003**  
As a registered admin user, if password reset link is sent successfully or if there are some errors on the form at the time of submission of the page, I should get some notice on the page. So I can check what's the problem with resetting my password.

**Description**

1. User will come here from User Story 002.
2. If reset password link sent successfully to user, then he'll see the text as shown here.

**Acceptance Criteria**

1. This message will be shown only after password reset link is sent successfully to user.
2. If user clicks on Close button then close the tab, because user is going to receive a link in his email box, after clicking on which he'll get redirected to password reset page automatically.

**User Story 004**  
As a registered admin user, if I click on password reset link that I have received on my mail, I should get on a page to reset my password.

**Description**

1. After user clicks on password reset link that he has received on his email, he'll land on this page.
2. If user clicks on expired link, then on this page, "Link Expired, please generate new password link" this message will be shown in pop up box. And user will get redirected to log in page again to work on Password Reset functionality again.
3. Once password reset is successful, user will get redirected to log in page.

**Acceptance Criteria**

1. User should be able to successfully change the password.

**User Story 005**

**User Story 005**  
As a registered admin user, if I changed my password successfully, then system should show me some confirmation message. So that I'll understand that my password has successfully been set.

**Description**

1. After successfully change the password, this pop up will be shown.
2. Once the user clicks on OKAY button, on pop up, he'll be redirected to Log In screen, where user can log in with his updated credentials.

**Acceptance Criteria**

1. pop up should only be shown after successful password reset
2. User should get redirected to log in screen after clicking on OKAY button.

**User Story 017**  
As a registered admin user, I should be able add new employees in the system. So I can assign them work in the system.

**Description**  
1. This will be part of Master Settings  
2. When user clicks on "Add New Employee" in User Story 16, this pop up will be shown.  
3. User can fill in employee details on this pop up and when user click on submit button at the end of pop up, the record will get added in the system.  
4. Once user clicks on Submit button, send a log in link to user via email and sms.  
5. This link will be valid for 30 minutes.  
6. Once the user clicks on the link if he is a user other than FOS, the redirect him to User Story 004. Rest working is as per User Story 004.  
7. If the user who receives the link is FOS user, then it will work as FOS app User Story 003

**Acceptance Criteria**  
1. Proper validations should be applied to all fields on the form.  
2. User should get credentials via email and sms  
3. Check if password expiration function works or not after 30 minutes.

**Submit**

The screenshot shows a web application interface for the AGPS Background Verification System. At the top, there's a header bar with the title "User Story 018" and the URL "https://www.microsoft.hrgird.com". Below the header is a blue navigation bar with the text "AGPS : Background Verification System". On the right side of the header, there's a user profile for "James Bond" and some settings icons. The main content area has a sidebar on the left containing links for Dashboard, Employee, Attendance, Contractor, Payroll, Recruitment, Training, Utilities, Timesheet, and Reports. The main content area displays a large wireframe representation of a table with many columns and rows, representing employee data. At the bottom center is a button labeled "UPDATE".

#### User Story 018

As a registered admin user, I should be able list all employees in the system. So that I can perform some operations such as enabling/ disabling / resetting password on those records.

#### Description

1. This will be part of Master Settings
2. When user lands on this page, he will see all the employees that we have added in the system. He can see basic details of the employee as shown in wireframe.
3. Admin user will be able to A. Enable B. Disable employee in system.
4. Admin user will be able to A. View employee's full details B. Send/Resent Credentials of the employee C. Edit employee

#### Acceptance Criteria

1. Listing should be properly get fetched from Database.
2. Before Enabling or Disabling user from system, the system should ask for confirmation.
3. After a successful or unsuccessful event, the system should show notification to user via pNotify library. These events include A. Enabling / Disabling user B. Sending credentials to user. C. Updating user details.

**User Story 033**  
As a registered admin user, I should be able to see dashboard. So that I can view Analytics about case related activities.

**Description**

1. By default the Dashboard will show records for current day in upper 4 boxes.
2. By default the Dashboard will show records for current month in line graph.
3. By default the Dashboard will show top FOS and TL performer for the current month.
4. If user selects a date range from the top right menu, then the records will be shown for the specified time period.
5. If you're TL then you'll be able to view Dashboard for your assigned cases only.
6. If you're admin you'll be able to see full dashboard
7. If you're other than admin then you'll be able to see Dashboard related to your records only.

**Acceptance Criteria**  
By default it will show result for today, but if user selects any other date range then change labels as

1. Total cases assigned in this date range.
2. AGPS verification cases trend during this period.
3. Top 10 performer during this period and so on.
